

Please do not expand LPFM service to take priority over current FM translator services. I am a listener to KLOVE in the Central Valley community of Modesto, and also throughout the state of CA as I travel often for work. This station is positive and listener-supported, without the annoying and inappropriate advertising found on most other radio stations. I, along with many of my friends who also listen to this station daily, would be negatively affected if KLOVE were displaced by an LPFM broadcaster providing other, less family-centered programming.

KLOVE also benefits the general public in our community by providing programming that educates the public and can be listened to by people of any age. This is unlike most other radio stations, which broadcast material that is not suitable for children or even teens.

I appreciate that the FCC provides this opportunity to comment and to let you know how important the KLOVE programming is throughout our state and other areas, as well. Please allow this wonderful broadcasting to continue without any diminution in service.

Sincerely,

Alison A. Foster
